Steps For MSIX packaging Tool

Step 5: Give the package information, and click on Next

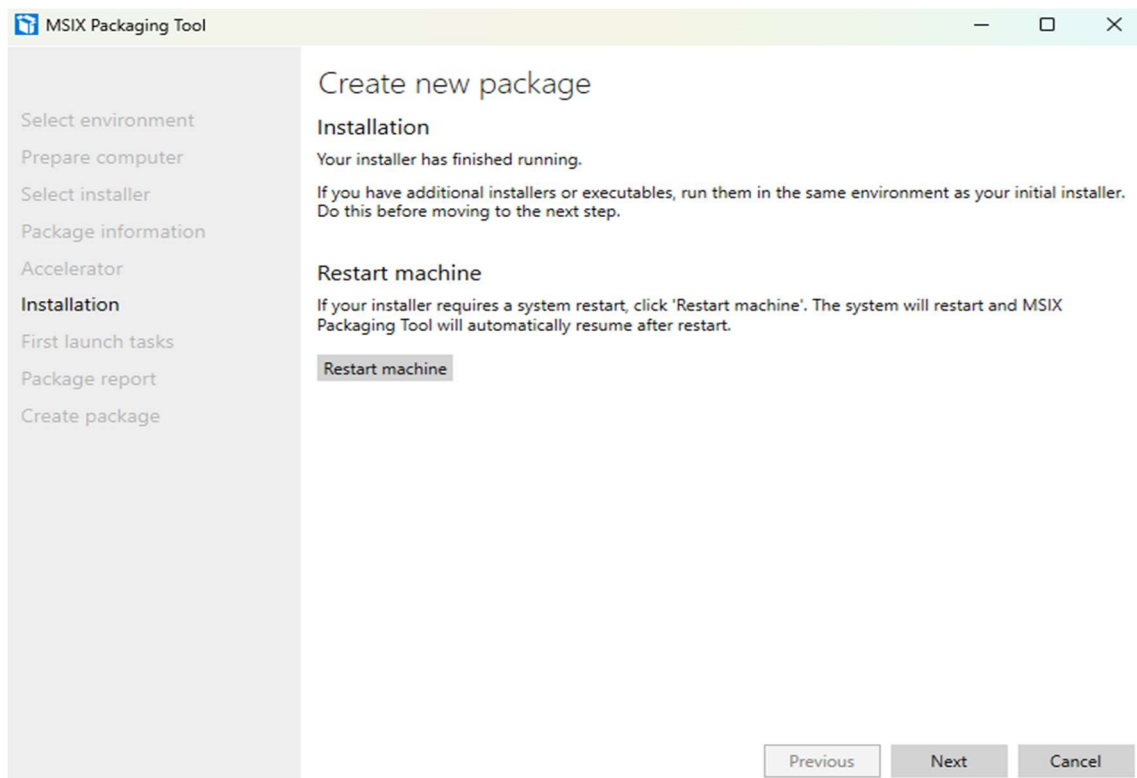

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' wizard. The left sidebar lists the steps: Select environment, Prepare computer, Select installer, Package information (highlighted), Accelerator, Installation, First launch tasks, Package report, and Create package. The main area is titled 'Create new package' and 'Package information'. It contains several input fields: 'Package name *' (Myeclipse), 'Package display name *' (Myeclipsepackage), 'Publisher name *' (CN=Myeclipse), 'Publisher display name *' (Myeclipsepackage), 'Version *' (1.0.0), 'Package Description' (My Description), and 'Installation location' (with a 'Browse...' button). There is a checkbox for 'Add support for MSIX Core to this package' with a link to <https://aka.ms/MSIXCore>. At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

Step 6: If you don't have an accelerator, click on next

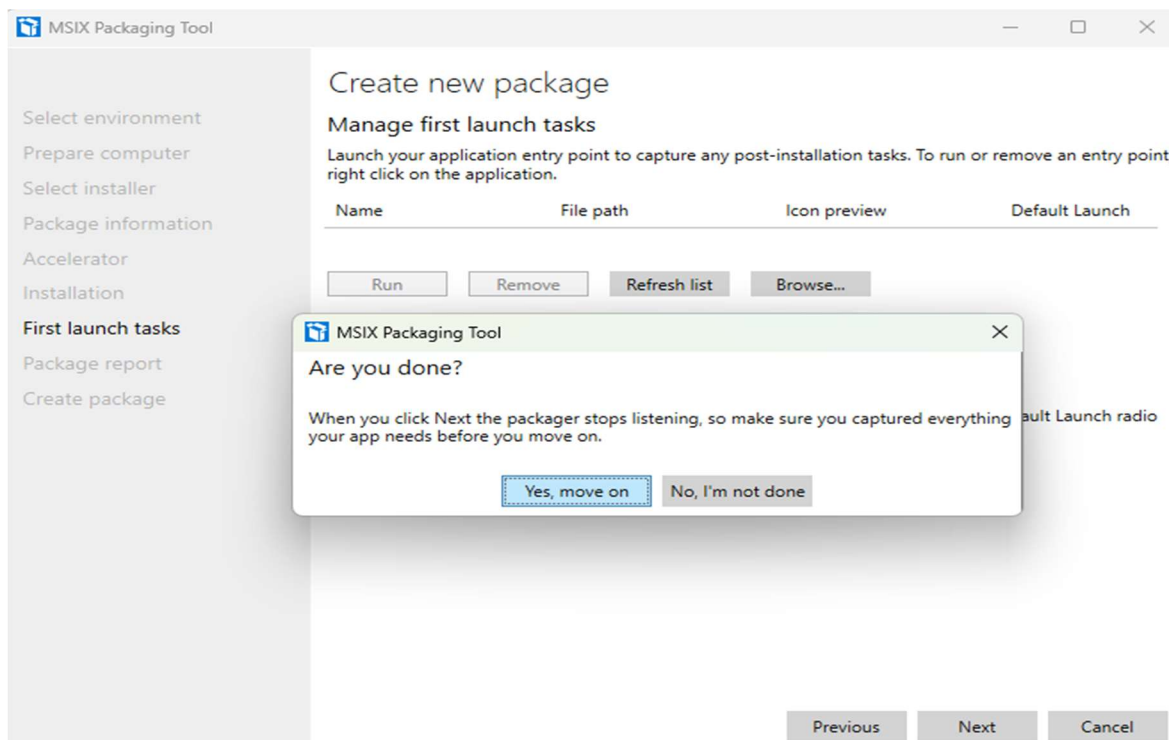

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' wizard. The left sidebar lists the steps: Select environment, Prepare computer, Select installer, Package information, Accelerator (highlighted), Installation, First launch tasks, Package report, and Create package. The main area is titled 'Create new package' and 'Choose the Accelerator for applying to the package'. It contains a text box for the accelerator name and a 'Browse...' button. Below the text box is a link to 'Sample Conversion Accelerators [here](#)'. At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.
